

PLANTBASED AT KULM

Dear guests

A diet free of animal products, mindfulness in dealing with nature and its creatures, as well as an increased awareness of our health are topics that are more present in our society than ever before. If we apply this awareness to our diet, a step in this direction is often associated with “doing without”.

At the Arosa Kulm Hotel & Alpin Spa, we believe that the full flavour and wholesomeness of a dish can be achieved without the use of animal products and without you feeling that something is missing!

To this end, our head chef Florian Mainzger has put together a purely plant-based menu for you that will leave you wanting for nothing.

We hope you enjoy and savour our vegan dishes!

Your Arosa Kulm Hotel & Alpin Spa Team
